An abdominal examination is a portion of the physical examination which a physician or nurse uses to clinically observe the abdomen of a patient for signs of disease. The physical examination typically occurs after a thorough medical history is taken, that is, after the physician asks the patient the course of their symptoms. The abdominal examination is conventionally split into four ...

Summary. A fundamental part of physical examination is examination of the abdomen, which consists of inspection, auscultation, percussion, and palpation. The examination begins with the patient in supine position, with the abdomen completely exposed. The skin and contour of the abdomen are inspected, followed by auscultation, percussion, and palpation of all quadrants.
