The MaxxForce 7, the International/Navistar engine which is a 6.5L V8 engine or also known as the 6.4 L PowerStroke in 2008-2010 model year Ford Super Duty trucks, is a V8 turbo-diesel engine. The engine has a Series Sequential Turbocharger. They are not twin turbos, there is a high pressure and low pressure turbo, with only the high pressure turbo being a VGT (variable geometry turbo). The ...

[Sell Us Your Cores - Diesel Punk Core](#)

The 6.4L Power Stroke is based on International's MaxxForce 7 engine platform. International's design moved from the dated HEUI to a common rail injection system, the heart of which is a Bosch CP4 injection pump. The engine also takes advantage of sequentially mounted twin turbochargers, which provides such benefits as reduced turbo lag and improved overall performance characteristic. Learning ...

On 4/3/12 it blew its 2nd high pressure oil line, on 3/7/12 my truck was cruising along and it just shut off, it had 4inches of fuel in passenger side tank and 9inches in driver side tank. The company spoke to 5 star of Lancaster and they believed the truck was out of fuel, well we got fuel and that still didn't fix the problem. Those are just the most recent 2 issues with just the truck that ...

If you're looking for a reliable stock engine build, we will use the International Maxxforce pistons which were released in the HD version of the 6.4L engines. These pistons have a different bowl design that is basically the same as the 'de-lipped' version you may have seen. We have yet to crack one of these pistons with multiple trucks having over 100,000kms on their rebuild without any ...

I own a 2007 International 4300 DT466 engine with Hydraulic Power Brake system. My ABS light is on and I didn't know what the problems was. I run the scanner after turning the truck on and rolling few feet and gave me the code. I even unplugged abs and IAT sensors and was reported by scanner. I give 4 stars due low quality and slow or laggy response while live data screen. But for the price ...

Needs an engine. It had an issue of oil pumping into the radiator. The disassembled radiator, motor and other parts are palleted and stacked on the truck chassis. It has tires for trailering on it and they mostly poor. It was set up for Tenco plow controls. The hydraulic reservoir is intact except the pump. Needed EGR and had a new turbo replacement.
