Content area standards also emphasize the importance of learning words. For example, the math standards require the following: Kindergarten students must "identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres)," and they must "correctly name shapes regardless of their orientations or overall size." Sixth grade students ...

One of the most common and persistent scientific misconceptions is that Earth's seasons are caused by Earth's distance from the sun. A closely related and perhaps more common misconception is that the equator is warmer than the poles because the equator is significantly closer to the sun than are the poles (i.e. the equator "bulges out" toward the sun).
