This instruction should include activities in which children learn to identify, name, and write both upper case and lower case versions of each letter. What is the "alphabetic principle"? Children's reading development is dependent on their understanding of the alphabetic principle – the idea that letters and letter patterns represent the sounds of spoken language. Learning that there are ...

There are many activities that can help build auditory processing skills, whether it be in the area of phonological awareness, auditory discrimination, or any of the other areas in this realm. Rhyming games, for example, can help build phonological awareness as well as discriminating between similar and different sounds. Sorting games can help build auditory memory, as the number of variables ...

Educational psychology is the branch of psychology concerned with the scientific study of human learning. The study of learning processes, from both cognitive and behavioral perspectives, allows researchers to understand individual differences in intelligence, cognitive development, affect, motivation, self-regulation, and self-concept, as well as their role in

learning.
